Water Quality Evaluation — Weekly Summary

Real-time sensor telemetry and Water Quality Index (WQI) compliance monitoring.

EXECUTIVE COMPLIANCE SUMMARY

Total Monitored Stations: 0 | Safe Stations: 0 | Caution: 0 | Critical Alert: 0

Station	Location	pH	Turb(NTU)	Temp(°C)	DO(mg/L)	TDS(ppm)	WQI	Status

Water Quality Index (WQI) Methodology

The Water Quality Index is computed based on weighted arithmetic index guidelines formulated by WHO and BIS (IS 10500:2012). Parameters are scored against permissible drinking limits: pH (6.5-8.5), Turbidity (<50 NTU), Dissolved Oxygen (>5.0 mg/L), and TDS (<500 ppm). Stations scoring 70-100 are Safe; 50-69 require Caution; scores below 50 indicate Unsafe / Alert conditions.
